◊ Experienced programmer with a wide-ranging proficiency in Java, C, C# and Python, and Full-Stack development. Over four years of hands-on experience in software development and education.

◊ Throughout my professional career I have developed a strong ethical code and good interpersonal skills. In addition, I have obtained the ability to make pragmatic decisions and never stop learning, particularly in the realm of technology.

◊ Passionate Software developer seeking a full-time position to contribute my skills to a dynamic team. Open to part-time opportunities as well.

Work Experience:

CS Mentor | Loop INC | Nazareth | 2019-2022

- Facilitated technological training for high school students in various programming and web developing, including Java, C, C#, Bash, HTML, CSS, Javascript and more.
- Mentored students on individual projects, providing personalized guidance and feedback to support their growth as programmers and developers.

CS Tutor | Freelance | Remote | 2021-active

- Debugging and Project Support for University Students.
- Utilized strong programming skills in **C/Java/Python/Web development** languages to provide remote software engineering support.

Technical support | Babcom - Partner | Migdal Haemek | 2018-2019

- Provided technical support to customers, troubleshooting and resolving issues efficiently.

Education:

Bachelor's Degree in Information Systems Majoring AI | University Of Haifa | 2021 - Present (Expected Graduation: 2024)

- Achieved high academic grades, with an average of 86.
- Demonstrated mastery of several programming languages, including C, C#, Java, Python, Javascript and many more through successful completion of rigorous coursework and hands-on projects.

Projects:

Taskify

- Taskify empowers users to efficiently manage daily tasks and to-do lists through features like user registration, login, password recovery, and seamless task creation and management. With the use of MySQL database backend for data storage and retrieval.

Delivery-System

- Designed and implemented a Java-based delivery system with a user-friendly GUI, featuring a secure login system for managers, region management allowing addition of members, and comprehensive delivery management capabilities. Employed File I/O operations for efficient data handling, ensuring seamless functionality.

Language Proficiency:

- Arabic: Native speaker
- Hebrew | English: Highly proficient in reading, writing, and speaking.
